# Core-Bank RESTful API Document UAT

**1. function name :** Register Organization
**url:** http://192.168.10.55:6611/nbb/api/user/regis
**method :** POST
**msg JSON input format:**
auth_name : "String"
auth_pass: "String"
status : ຖືກຜິດ

**2. function name :** Register token
**url:** http:// 192.168.10.55:6612/nbb/api/user/token
**method :** POST
**msg JSON input format:**
auth_name : "String"
auth_pass: "String"
status : ຖືກຜິດ

**3. function name :** Get credit
**url:** http:// 192.168.10.55:6601/nbb/api/crd/get/info
**Require :** token
**method :** POST
**msg JSON input format:**

```
{
      "auth_id" : 5,
      "auth_name" : "nbb",
      "acno" : "070101000889048"
}
```

**4. function name :** Get deposit
**url:** http:// 192.168.10.55:6602/nbb/api/dpt/get/info
**Require :** token
**method :** POST
**msg JSON input format:**

```
{
      "auth_id" : "5",
```

```
        "auth_name" : "nbb",
        "acno" : " 180101000000484948"
}
```

**5. function name :** Get txinv
**url:** http:// 192.168.10.55:6603/nbb/api/txinv/get/info
**Require :** token
**method :** POST
**msg JSON input format:**

```
{

        "auth_id" : "5",
        "auth_name" : "nbb",
        "txrefid" : "220602000009307832"
}
```

**6. function name :** Get ctm
**url:** 192.168.10.55:6604/nbb/api/ctm/get/info
**Require :** token
**method :** POST
**msg JSON input format:**

```
{

        "auth_id" : "1",
        "auth_name" : "nbb",
        "ctmcode" : "0101040889"
}
```

**7. function name :** Get crd by customer
**url:** 192.168.10.55:6604/nbb/api/ctm/get/credit
**Require :** token
**method :** POST
**msg JSON input format:**

```
{

        "auth_id" : "1",
        "auth_name" : "nbb",
        "ctmcode" : "0201040927"
}
```

**8. function name :** Get crd by customer
**url:** 192.168.10.55: 6601/nbb/api/crd/get_history/info
**Require :** token
**method :** POST
**msg JSON input format:**

```
{
      "auth_id" : 1,
      "auth_name" : "nbb",
      "acno" : "100201001410908",
      "fromDate" : "04-10-2022",
      "toDate" : "05-10-2023"
}
```

**9. function name :** Get log
**url:** [http://192.168.10.55/phpmyadmin/](http://192.168.10.55/phpmyadmin/)
**user : nbb**
**pass : Abcd!234**

**10. function name :** Get bol 06
**url:** 192.168.10.55:6606/v1/api/get_mis
**Require :** token
**method :** POST
**msg JSON input format:**

```
{
      "auth_id" : 1,
      "auth_name" : "nbb",
      "branchId": "0201",
      "fromDate" : "01-12-2023",
      "toDate":"31-12-2023"
}
```

**10.1 function name :** Get bol 06 from log
[http://192.168.10.55:6606/file/0201-01-12-2023-to-31-12-2023.json](http://192.168.10.55:6606/file/0201-01-12-2023-to-31-12-2023.json)
**10.1 function name :** download bol 06 from log
http://192.168.10.55:6606/download/0201-01-12-2023-to-31-12-2023.json
